## Private-sector employment in Appalachian Maryland

This report provides an overview of private-sector employment in Appalachian Maryland. All data featured in the report come from [data-Fab](#), which uses a proprietary algorithm to estimate industry-specific employment values for each county in the United States. In many cases, due to data suppression issues, public datasets do not provide the level of detail required (i.e., industry-specific estimates) to perform meaningful analyses of geographies with low population or employment levels (i.e., many rural counties).

Data-Fab uses publicly available data from the U.S. Bureau of Labor Statistics—the Quarterly Census of Employment and Wages (QCEW)—and then “fills in” unknown or suppressed values. The resulting dataset, featured throughout this report, allows for industry-specific employment estimates.

Without a dataset that “fills in” these missing values, discussion surrounding county-level employment can oftentimes be limited to only high-level, broad categories such as “Manufacturing.” With data-Fab, however, 91 industries are examined—and in the case of manufacturing, 18 specific types of manufacturing are included as distinct categories (e.g., “Paper Manufacturing” and “Transportation Equipment Manufacturing”). Descriptions of each industry are available by clicking on the links in Table 6 below.

In addition to state-specific reports (such as this one), a spreadsheet is available on ARC’s website, where users can create custom data pulls that compare geographies and industries of particular interest.

Figure 1 compares **changes in total employment** levels from 2016 to 2021 across five geographies.

Appalachian Maryland saw a *decline* of 6.6% over the time period, which was larger than the decline experienced in the non-Appalachian portion of the state (-1.8%). Meanwhile, the United States as a whole and the Appalachian Region both experienced *increases* in total employment, at 1.8% and 0.4% growth, respectively.

Figure 1 – Employment change, 2016 to 2021

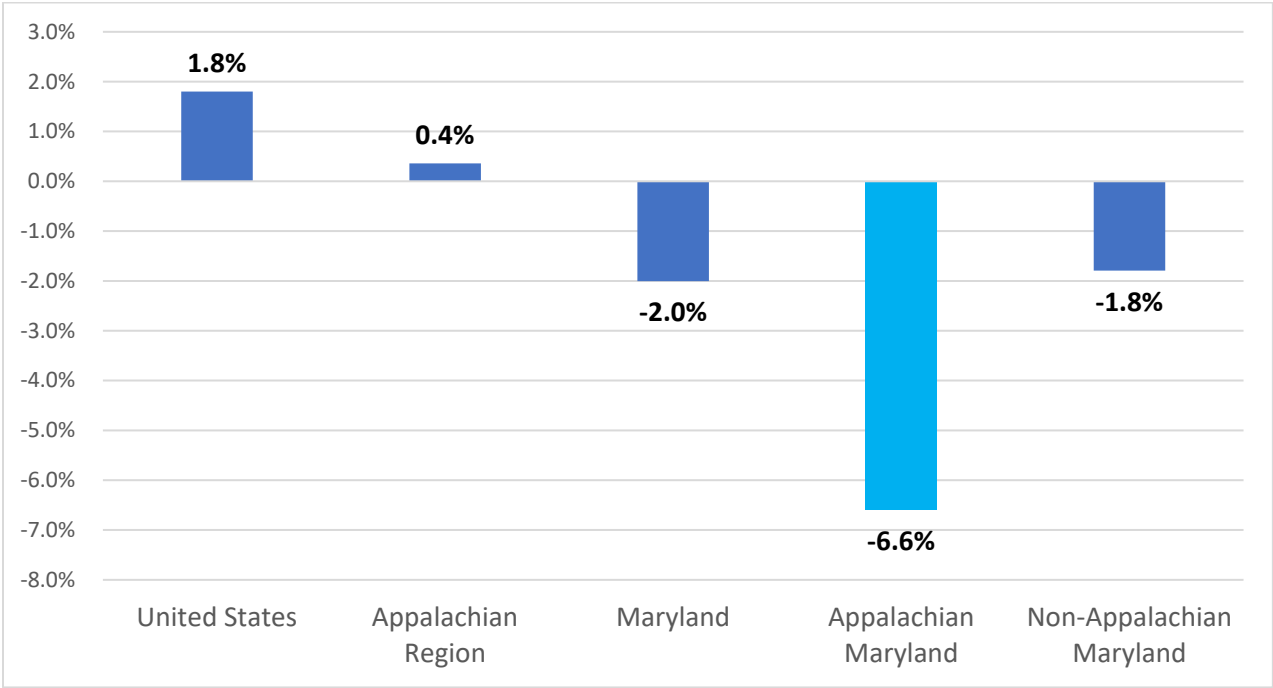

Table 1 ranks industries by **employment levels** in 2021.

Also included in the table are **industrial shares**, which represent the percentage of total employment constituted by any given industry. For example, in 2021, **Food Services and Drinking Places** accounted for 9.6% of total employment in Appalachian Maryland.

Two **employment change** variables are also included: **number** and **percent**. The aforementioned industry—**Food Services and Drinking Places**—saw a 5.5% decline in employment from 2016 to 2021, representing a loss of 488 jobs.

Table 2 ranks industries by **employment change**, in **absolute** terms (i.e., the number of jobs added or lost), from 2016 to 2021.

The top ten rows display the industries that had the largest *increases* over the time period. **Couriers and Messengers** saw the largest growth, gaining 1,318 jobs over the five-year span.

The bottom ten rows display the industries that had the largest *decreases* over the time period. **Credit Intermediation and Related Activities** saw the largest decline, losing 2,690 jobs from 2016 to 2021.

Table 3 ranks industries by **employment change**, in **relative** terms (i.e., percent change), from 2016 to 2021. Quick note: only industries that had at least a 0.5% industrial share in 2016 are included in the table; otherwise, industries with low employment numbers would dominate the table (e.g., an industry jumping from 2 to 4 employees is a 100% increase).

The top ten rows display the industries that had the largest relative *increases* over the time period. **Couriers and Messengers** saw the largest growth, going from 2,083 jobs in 2016 to 3,401 in 2021. These 1,318 added jobs represent growth of 63.3%.

The bottom ten rows display the industries that saw the largest relative *decreases* over the time period. **Wholesale Electronics Markets and Agents and Brokers** saw the largest decline, dropping from 839 jobs in 2016 to 194 in 2021. These 645 lost jobs represent a decrease of 76.9%.

Table 4 ranks industries by **location quotient** in 2021. Location quotients allow us to see how specialized industries are in Appalachian Maryland relative to the United States as a whole. They are calculated by simply dividing industrial shares in Appalachian Maryland by industrial shares for the country overall.

For example, in Appalachian Maryland, there were 5.6x as many employees—in relative terms—in **Furniture and Related Product Manufacturing** in 2021 than in the United States as a whole. (The industrial share for the industry was 1.7% in Appalachian Maryland, compared to 0.3% in the United States as a whole.)
