PROJECT SUMMARY

The University of Pittsburgh will use ARISE funding to develop a plan to grow biotech and healthcare sectors in southwestern Pennsylvania and West Virginia. In collaboration with 14 partners, the project plan will create a roadmap for increasing workforce development opportunities, supporting local businesses, and attracting new industries to increase equitable access to high-quality job opportunities—impacting 65 counties.

The University of Pittsburgh and West Virginia University bring a combined \$187,200 in matching funds to this project, which will produce a comprehensive workforce and development plan at the end of the one-year performance period.
