PROJECT SUMMARY

Mountain State Educational Services Cooperative will use ARISE funding to implement a prior ARISE planning project that will introduce middle school students to career-oriented education and experiences, real-world problem-solving skills, and simulated workplace environments. Impacting 12 counties across three Appalachian states, this innovative education model will increase students' engagement in the local economy and environment— and awareness of community needs and possible solutions.

Mountain State Educational Services Cooperative and partners bring a combined \$2,250,750 in matching funds to this project, which is expected to serve 6,000 students, 745 workers, and 30 organizations throughout the 5-year performance period.
